

Electric lighting by incandescence, and its application to interior illumination; a practical treatise

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: ...candles. (Signed) H. H. Edgerton. In order to compare the light with that afforded by ordinary gas-burners, the different burners in ordinary use, with coal gas, may be rated about as follows, for a rate of five cubic feet per hour consumption: Ordinary fish-tail, Scotch tip, about 5 candles. Young America, brass fish-tail, 8 candles. Gleason, noiseless Argand, 11 candles. Lava tip (excavated head), 12 to 13 candles. A very large flame, burning at a rate of 8 or 9 cubic feet, will give a prorata light of about 15 candles for 5 cubic feet. The above is based upon gas made from ordinary Pittsburgh coal. Mixtures of cannel or naphtha improve the quality according to the amount used. (Signed) H. H. Edgerton. London is supplied with gas of 16 candle-power per 5-foot burner. The Liverpool street-lamps give a light at the rate of 16 candles per 5 cubic feet with 4 cubic feet consumption. Fig. 00. Large Sawyer Lamp. tion of ? inch. Owing to the greater intensity at which the large lamp is run, the working duration of the pencil, when the globe is perfectly charged with nitrogen, is about 200 hours. The cost of renewal (that of the carbon and nitrogen elements) is largely in excess of the cost of renewal in the small lamps, and varies from 25 to 30 cents per lamp. The permanent, elastic closing of the Sawyer globe in its metallic containing-cup is the only method yet devised that affords the necessary hermetical sealing, excepting that of Geissler, which is employed by Mr. Edison. Many experimentalists in this line have employed hydraulic joints: Kosloff employed a bath of olive-oil around the joints; Guest and others have employed quicksilver; our own experiments, of a similar character, have been confined to

viscous hydrocarbons. But all these devices are ina...
