

The American Cattle Doctor: A Complete Work on All the Diseases of Cattle, Sheep and Swine (Classic Reprint)

Excerpt from The American Cattle Doctor: A Complete Work on All the Diseases of Cattle, Sheep and Swine Americans rank high in the estimation of the scientific world for their genius and industry in the great work of intellectual, moral, and scientific improvements. See what has occurred in the arts of printing, electrotyping, etc. The eloquence of the great literary magicians of the New World, the honored graduates of free institutions and free schools, no sooner falls from their lips than the phonographist transfers it to paper, the nimble fingers of the compositor puts it into form; next the battery deposits on the face of the type a more durable coating of copper, and Hoes press sends off impressions with almost magical rapidity. No less surprising are the wonderful feats performed by American mechanics, in the construction of fast yachts and steamers, which often pluck a laurel from the so-called Mistress of the Sea; and old Uncle John gives us due credit for perfecting a race of fast trotters that can beat the world of horseflesh. Improvements in every department of Science and Art are constantly treading on the heels of improvement; yet, as regards the science of Veterinary Medicine and Surgery, America seems almost the last among civilized nations to put her shoulder to the wheel. What can be the reason? Her youth may be offered as a plea for excuses. The daughter of the Old World has not yet, in this department, arrived at years of discretion; she is yet in her teens.
