

Genera of Humming Birds: Being Also a Complete Monograph of These Birds (Classic Reprint)

Excerpt from Genera of Humming Birds: Being Also a Complete Monograph of These Birds
In preparing this volume I have done my best; but I do not presume that it is without fault or errors, and it is probable that in the next twenty years or so, many new forms will be discovered, and will enable other authors to make a better classification of these Birds: but nevertheless, I think that this work, like those of my predecessors, from Linne, Vieillot, Gmelin, Lesson, Jardine, c., to Gould, Mulsant, Bourcier, Elliot, Salvin, Berlepsch, Lawrence, Ridgway, Reichenbach, Heine, and others, will help greatly to attain that end. Each author must be satisfied in adding a stone to the edifice until its perfect completion. I am more convinced than ever that these beautiful birds stand quite alone by themselves. They can be considered as the handsomest and most perfect, and are fully entitled to be classified separately under the name of Trochili, as I have proposed for them in my Catalogus Avium, London, 1876. In this volume, I have distributed all the species known into eighteen families, believing that in doing so, it will facilitate their study. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
